

Objective: Disassemble the puzzle and construct a dachshund of size 2,4, and then 6.

About the puzzle: Screwy-Louie is a dog themed rendition of Oskar's *ziggu-stretch* puzzle. It is a frameless N-ary design inspired by the Ziggurat puzzle.

(see Oskar's video at: <https://tinyurl.com/mx7cz7kd>)

Solution: The puzzle has two different piece types, A & B. To disassemble with the head facing you, all of the *B* pieces move CCW and *A* pieces move CW. Starting with B1, rotate the pieces one at a time following a 4-ary sequence. The start of the sequence is below. For re-assembling, engage each piece, one at a time and back the most recently added piece off until the next piece is allowed to engage when adding it to the assembly. Further is explained in the above video from Oskar.
